

Comparability and reproducibility of biomedical data

Raphael Gottardo and Yunda Yuang

June 19, 2012

Abstract

1 Introduction

2 Reproducibility of assay and primary data

2.1 Overview of data generation process and its impact on C&R

2.2 Metrics to quantify C&R

2.3 Standards and data sharing

3 Reproducibility of assay results and derived data

3.1 Tools for reproducible analyses

3.2 Standards and code sharing

3.3 Authoring tools

4 Conclusion
